

Intrinsically safe melt pressure transmitter for pressure measurement in hot media Series EMT4X0 2

Description

The intrinsically safe melt pressure transducer series EMT based on the proven melt pressure transmitter series MDT. The integrated, PTB-approved, 2-wire mAmp amplifier converts the process pressure into an proportional output signal. The 2-wire mAmp-amplifier technique is insensitive to noise and well suited for economical long cable runs.

Many of the features found in Dyniscos standard MDT-series have been incorporated into the EMT-series, including proven bonded strain gauge construction for stable operation, a rigid stem between the diaphragm and the amplifier housing and a flush diaphragm. Another advantage is the electrical built-in calibration.

Features

- Intrinsically safe according Ex-safety class
EEx ia IIC T5 up to 80 °C and EEx ia IIC T1-T4 up to 85 °C
- Installation for media temperature up to 400 °C
- Rigid stem between diaphragm and housing
- Electrical built-in calibration

Performance Characteristics

Pressure range	0 - 17 bar to 0 - 2000 bar	Maximum overload (without influencing operating data)	2 x pressure range for range 1000 and 1400 bar max. 1750 bar and max. 2450 bar for range 2000 bar
Accuracy	EMT420 2 ± 0,5 % f.s.v. - up to 50 bar ± 1 % f.s.v. EMT460 2 ± 1 % f.s.v.	Burst pressure	6 x pressure range max. 3000 bar
Repeatability	EMT420 2 ± 0,1 % f.s.v. - up to 50 bar ± 0,2 % f.s.v. EMT460 2 ± 0,2 % f.s.v.	Material in contact with media	15-5 Mat. No. 1.4545
Resolution	infinite		

Electrical Characteristics

Configuration	4-arm Wheatstone bridge strain gauge (DMS)	Power consumption	< 20 mA
Output signal	4 - 20 mA ($R_L < 750 \Omega$ at 28 V or $< 145 \Omega$ at 15 V)	Zero balance	- 2 % / + 10 % of full scale adjustable
Supply voltage	15 - 28 V DC -15% +0% via approved electrical equipment acc. to EN 50 020	Internal Shunt-Calibration	80 % of full scale ± 10 %
		Isolation resistance	1000 Mw at 50 V DC

Temperature influence

Diaphragm

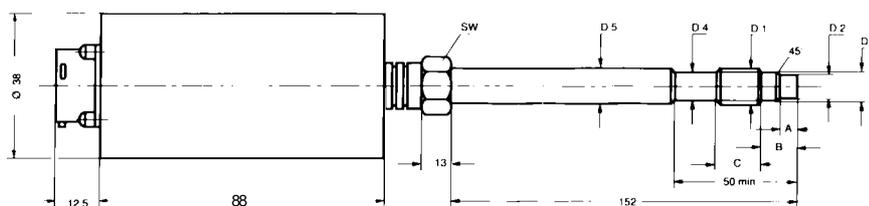

Max. Temperature	400 °C
Zero shift due to Temperature change	EMT420 2 ± 0,2 bar / 10 °C EMT460 2 ± 0,4 bar / 10 °C

Housing

Max. Temperature	85 °C
Zero shift due to Temperature change	± 0,2 % f.s.v. / 10 °C
Sensitivity shift due to temperature change	EMT420 2±0,1% f.s.v./10°C -up to 50 bar ± 0,2 % f.s.v./10°C EMT460 2±0,4% f.s.v./10°C

Intrinsically safe melt pressure transmitter for pressure measurement in hot media Series EMT4X2 2

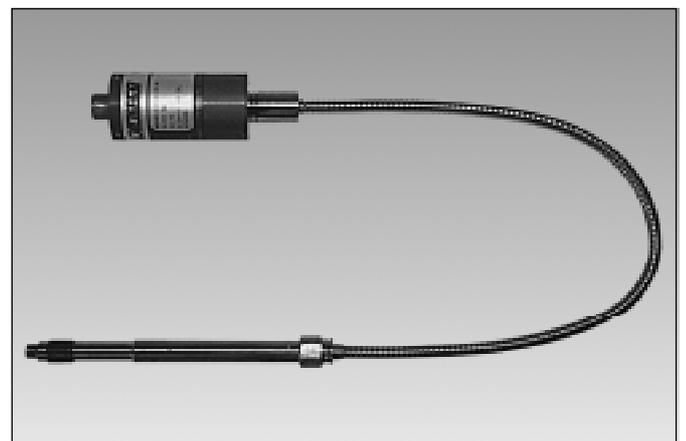

Description

The intrinsically safe melt pressure transducer series EMT based on the proven melt pressure transmitter series MDT. The integrated, PTB-approved, 2-wire mAmp amplifier converts the process pressure into an proportional output signal. The 2-wire mAmp-amplifier technique is insensitive to noise and well suited for economical long cable runs.

Many of the features found in Dyniscos standard MDT-series have been incorporated into the EMT-series, including proven bonded strain gauge construction for stable operation, a flexible armored capillary between the amplifier housing and the rigid stem and a flush diaphragm. Another advantage is the electrical built-in calibration.

Features

- Intrinsically safe according Ex-safety class
EEx ia IIC T5 up to 80 °C and EEx ia IIC T1-T4 up to 85 °C
- Installation for media temperature up to 400 °C
- Flexible capillary between rigid stem and housing
- Electrical built-in calibration

Performance Characteristics

Pressure range	0 - 17 bar to 0 - 2000 bar	Maximum overload (without influencing operating data)	2 x pressure range for range 1000 and 1400 bar max. 1750 bar and max. 2450 bar for range 2000 bar
Accuracy	EMT422 2 ± 0,5 % f.s.v. - up to 50 bar ± 1 % f.s.v. EMT462 2 ± 1 % f.s.v.	Burst pressure	6 x pressure range max. 3000 bar
Repeatability	EMT422 2 ± 0,1 % f.s.v. - up to 50 bar ± 0,2 % f.s.v. EMT462 2 ± 0,2 % f.s.v.	Material in contact with media	15-5 Mat. No. 1.4545
Resolution	infinite		

Electrical Characteristics

Configuration	4-arm Wheatstone bridge strain gauge (DMS)	Power consumption Zero balance	< 20 mA - 2 % / + 10 % of full scale adjustable

Intrinsically safe melt pressure transmitter for pressure measurement in hot media Series EMT4XX 2

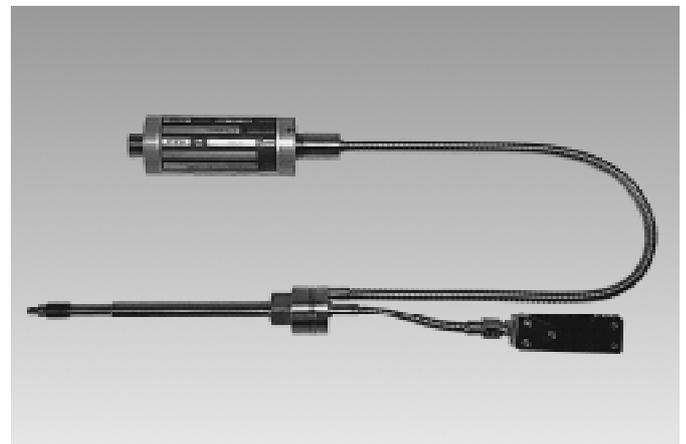

Description

The intrinsically safe melt pressure transducer series EMT based on the proven melt pressure transmitter series MDT. The integrated, PTB-approved, 2-wire mA amplifier converts the process pressure into an proportional output signal. The 2-wire mA-amplifier technique is insensitive to noise and well suited for economical long cable runs. The EMT-series 432/463 features an integral thermocouple that allows pressure and temperature to be measured in a single sensor.

Many of the features found in Dyniscos standard MDT-series have been incorporated into the EMT-series, including proven bonded strain gauge construction for stable operation, a flexible armored capillary between the amplifier housing and the rigid stem and a flush diaphragm. Another advantage is the electrical built-in calibration.

Features

- Intrinsically safe according Ex-safety class
EEx ia IIC T5 up to 80 °C and EEx ia IIC T1-T4 up to 85 °C
- Integral thermocouple for simultaneous temperature measurement at the media
- Installation for media temperature up to 400 °C
- Flexible capillary between rigid stem and housing
- Electrical built-in calibration

Performance Characteristics

Pressure range	0 - 17 bar to 0 - 2000 bar	Maximum overload (without influencing operating data)	2 x pressure range for range 1000 and 1400 bar max. 1750 bar and max. 2450 bar for range 2000 bar
