The CPL35L is a programmable voltage and current transducer. The various output options allow a wide range of application: measurement, protection, control. The second analog output allows simultaneous measurement of voltage and current in total isolation.

Measurement:

- Direct input of AC or DC voltage and current or with transformer or shunt (configurable PT and CT ratios or shunt sensitivity).
- AC voltage up to 1200V or up to +/-1800V for DC.
- 3 current input ranges: 200mV (external shunt) ,1A - 5A internal shunt.
- Hall effect current sensor (+/- 4V rating signal, +/- 10V peak)
- Programmable integration time from 10 ms to 60 seconds for the measurement in slow waves train applications.
- Frequency range from 1Hz to 440 Hz.
- Peak value detection function on voltage measure with programmable hold time.

Front face:

- 4 digit alphanumeric LED matrix display for the measurement
- 3 red LEDs for relays status indication
- 2 push buttons for:
The fully configuration of device
Selection of displayed value (U, I, Hz)
Setting of alarm thresholds,

Relays (/R option):

- Up to 3 relays configurable in alarm with selection of monitored value (U, I, Hz). Threshold, direction, (and window alarms) hysteresis and delays are individually adjustable on each relay (activation and deactivation delay).
- Hold function (alarm memorization and Reset by front face)

Analog output (/S option):

- 1 or 2 isolated analog outputs. Fully configurable:
type and measure range to monitor (U, I, Hz),
type and range of output signal (0 .. 10 Volts, 0 ... 4 ... 20 mA),
+/-10V output by coupling the two outputs,
Response time (filter), limitation... for each outputs.

Configuration:

- The CPL35L can be configured via the front face or with the serial link (USB cable -> 3.5 jack plug available separately)
- Firmware update is possible via the USB-serial link.

Feature:

- DIN rail mounting (symmetrical), pluggable terminal blocks
- protection rating: IP20, conformal coating,
- Hinged front face (pushbuttons and serial access).
